Behavioral Health Services
Prevention & Intervention

Our team:

Nurses make sure a child is “on track” developmentally and in good health.

Behavior specialists support and make sure parents have the tools to parent their child positively.

Mental Health professionals can provide additional mental health intervention for families.

Connect The Tots works with families with young children to promote wellness and reduce risk factors for emotional problems in children as they prepare for school. Supportive services are provided to the entire family with the goal of promoting healthy coping skills and strengthening the family’s ability to meet the emotional needs of their children. All services are provided at the home or at other convenient community locations to accommodate the needs of our participants.
