Wolf Haven International, a nonprofit sanctuary for captive-born wolves, presents Wolves, Coyotes and Wildlife, a family friendly educational program about wolf behavior, biology and social structure.

This education program takes a close look at the differences and similarities between wolf and coyote biology, behavior, social structure, historical and current ranges, and ecosystem roles. As wild wolves are now naturally recolonizing back into California, the program focuses on hiking and backpacking in wolf country.

We'll also look at how our domesticated dogs compare and contrast with these wild canids. The mission of the program is to embrace biodiversity and facilitate peaceful coexistence of all species.

The program includes engaging video footage of both wild wolves and wolves at Wolf Haven International, plus hands-on portions with animal skulls, tracks and antlers. Wolves, Coyotes and Wildlife will be offered on three different dates, June 2, August 25 and September 15. The same program will take place on all dates. This is a free event. Parking is free.
